

# Correction to “Effect of Linear Elongation on Carbon Nanotube and Polyelectrolyte Structures in PDMS-Supported Nanocomposite LbL Films”

Johannes Frueh,\* Naotoshi Nakashima, Qiang He, and Helmulth Möhwald

*J. Phys. Chem. B* **2012**, 116 (40), 12257–12262. DOI: 10.1021/jp3071458

The TOC and Abstract graphics show the effect from the delta dichroic ratio perspective, but the text in the graphics does not fit the image. The paper shows the perspective from the easier to understand total dichroic ratio and its change; therefore, the contradictions in the TOC and Abstract graphics might confuse the reader. The correct image for the TOC and Abstract is

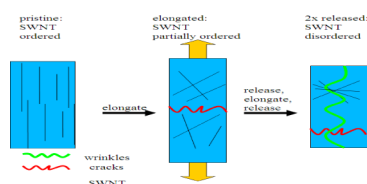

Figure S1 of the Supporting Information needs to be replaced. The pyrene group should be at C1 and not C2. The correct version is
