Jaime Ruiz-García, Abel Moreno, Gerald Brezesinski, Helmuth Möhwald, Jaime Mas-Oliva, and Rolando Castillo*: Phase Transitions and Conformational Changes in Monolayers of Human Apolipoproteins CI and AII

Page 11121. A transcription error resulted in an erroneous Figure 8 when this Article was published on the Web 9/12/2003 (ASAP) and in the October 9 issue (Vol. 107, No. 40, p 11121). The electronic version of the Article was corrected on 10/24/2003 and the corrected Figure 8 is provided here.

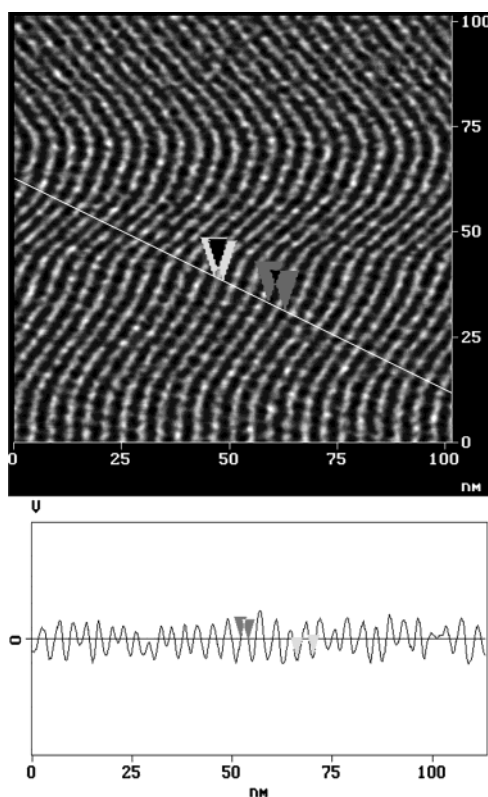

Figure 8. AFM image of a transferred monolayer of APO CI on mica at $\Pi = 43 \text{ mN m}^{-1}$ (above the L – LC phase transition). Vertical voltage profile: horizontal distance between dark gray arrows 2.0 nm; horizontal distance between light gray arrows 4.2 nm.
