On a Four-Dimensional Representation of DNA Primary Sequences [*J. Chem. Inf. Comput. Sci.* 43, 532–539 (2003)] by Milan Randić and Alexandru T. Balaban*. Department of Mathematics and Computer Science, Drake University, Des Moines, Iowa 50311, and Department of Marine Sciences, Texas A&M University at Galveston, Galveston, Texas 77553

Page 532. A misprint occurred in the human beta-globin DNA sequence, namely the 67th nucleotide base should be G (and not T which would result in the stop codon TTA for the 23rd triplet).
