

ADDITIONS AND CORRECTIONS

1998, Volume 102B

Jeremy Kua and William A. Goddard III*: Chemisorption of Organics on Platinum. 2. Chemisorption of C_2H_x and CH_x on Pt(111)

Page 9495. The binding energy of ether on Pt_8 should read 48.59 kcal/mol in Figure 6. The numbers in the tables are correct, so those do not need to be changed.

Page 9497. The CH_y species were wrongly scaled by a constant factor in Figure 11. This is the correct diagram.

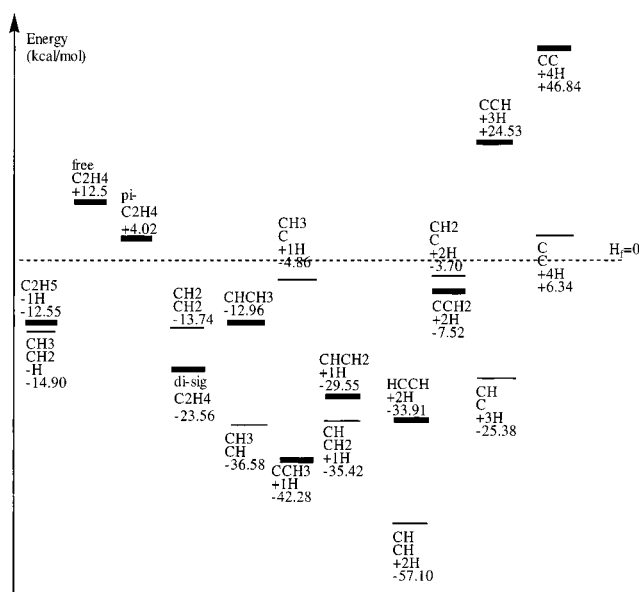

Figure 11. Heats of formation of C_2H_x and CH_y species.
