

ADDITIONS AND CORRECTIONS

1999, Vol 104B

Mark J. Henderson, A. Robert Hillman,* and Eric Viel:
Ion and Solvent Transfer Discrimination at a Poly(*o*-toluidine)
Film Exposed to HClO₄ by Combined Electrochemical Quartz
Crystal Microbalance (EQCM) and Probe Beam Deflection
(PBD)

Page 8900. In the above article, a typographical error was present in defining the sign convention for deflection of the light beam. In the paragraph just after eq 2, the text should have read:

With this experimental arrangement, a negative deflection indicated a concentration profile increasing toward the electrode and a positive deflection indicated a concentration profile increasing, with respect to distance, into the electrolyte.
