Anne F. Runge, Nicole C. Rasmussen, S. Scott Saavedra, and Sergio B. Mendes*: Determination of Anisotropic Optical Constants and Surface Coverage of Molecular Films Using Polarized Visible ATR Spectroscopy. Application to Adsorbed Cytochrome *c* Films

Page 427. Equation 16 should read

$$-\chi''(\nu) = 2n_{m+1}k_q(\nu) = 2n_{m+1} \frac{\lambda \ln(10) \epsilon(\nu)\Gamma}{4\pi t_q} \quad (16)$$

with a double prime on χ .
